### FOUR NUMBER COURSE

#### Parent-Teacher Association Contract With Redpath Bureau

Under direction of the Parent-Teachers Association Laclede will have a four number lecture course the coming fall and winter. The contract was made some time ago with an agent for the Redpath Lyceum Bureau.

The numbers are The Bonnie Brook Co.; Geo. C. Adelotte, lecturer; Marvel Miller, interpreter of modern stories and plays; The Yanks' Quartet, four boys who fought for liberty and democracy in the great world war.

Season tickets are soon to be placed on sale and it is hoped people will buy as liberally as possible and give the ladies who have undertaken to provide these high class entertainments all the encourage their efforts deserve.

## E-B CULTIVATOR

### Balance Lift—Foot Control

THE light weight and simplicity of this cultivator will appeal to every farmer. By doing away with levers and springs and applying the weight of the operator, combined with the backward tendency of the wheels to lift and control the gangs, an easily operated and extremely light weight machine is made possible. Quick adjustment of the wheels balances your weight whether heavy or light—easy control of gangs—easy on horses' necks. The driver of this cultivator can ride in comfort, knowing that his weight added to the cultivator makes no more pull for his team than the average cultivator without him. In short, this cultivator is so simple, so compact, that it weighs about a man's weight less than the ordinary cultivator. Telescopic axes permit of varying width between wheels to suit width of row. Broad concave tires—long distance magazine wheel boxes. The cultivator for you. Come in and see one.

We have the above Cultivator in four or six shovel, Pin Break or Spring Trip.

**Much Lower Prices**

We can, and do, make much lower prices than our competitors for the following reasons: 1st, we buy material in large quantities and get extra special discounts, while they order one pair at a time and pay about twice as much. 2nd, We buy our material in either rough or semi-finished condition and do all the special grinding ourselves, while they have to pay a high price for all this work. 3rd, If a glass proves to need some change after having been worn a few days, we step into the grinding room and re-grind it without cost, while they must throw it away and order a new one. Of course they must charge extra to begin with to cover this loss.
